PURPOSE OF THE CAPITAL IMPROVEMENT PROGRAM

This document provides the residents of Seminole County with the Seminole County Board of County Commissioners' (BCC) Capital Improvement Program (CIP) for a five-year period through the fiscal year ending September 30, 2028. This document provides explanatory material on all capital projects contained within the FY23 adopted budget as well as active capital projects budgeted within FY22 which had available balances carried forward into FY23.

The Capital Improvements Program (CIP) provides a planned and programmed approach to utilizing the County's financial resources in the most responsive and efficient manner to meet its service and facility needs. The CIP serves as a "blueprint" for the future of the community. It is a dynamic tool, not a static accounting document. Development of the CIP requires integration of financial, engineering and planning functions. The CIP focuses on anticipated infrastructure requirements for six facility types required by the State of Florida, Parks, Solid Waste, Stormwater, Transportation, Water, and Wastewater. The CIP focuses on service level standards and the land use plan adopted by the Board of County Commissioners in order to preclude deficiencies in adopted level of services. The CIP is developed to achieve the following results:

- Establishing a system of procedures and priorities by which each proposal can be evaluated in terms of public need, adherence to the land use plan, the inter-relationships of projects, and cost requirements;
- Assuring that the five-year schedule of capital improvements is financially feasible.
- Scheduling capital projects over an extended period so the most efficient financial and management planning for the CIP can be achieved;
- Consolidating and coordinating departmental requests to facilitate consistent and transparent updates to the BCC for optimal decision-making;

PURPOSE OF THE CAPITAL IMPROVEMENT PROGRAM

The Capital Improvement Program provides for the acquisition, construction, reconstruction, initial fixtures and equipment, renovation, rehabilitation, or replacement of facilities and any related costs for land acquisition, land improvements, design, feasibility studies, engineering studies and engineering. It includes projects which are, or will become, the property of Seminole County, as well as projects that although not owned by the County, will be part of a joint project agreement with other governmental entities. Generally, a capital project is planned and executed in phases as follows:

Project Development: These are costs incurred by the County to identify project requirements, and to define a project's work scope including preliminary design studies, permitting requirements, data collection, public involvement, legal and technical documentation, cost estimates, environmental impacts, and assessment of alternatives.

Design: These are costs incurred by the County to design a project in accordance with the scope of work set forth in the development phase. This includes professional consultant fees, legal and technical documentation, constructability review, data collection, advertising, assessment of alternatives related to project design, construction management services and bid reviews.

Land: Costs incurred by the County for the purchase of land, easements and right-of-way. This also includes purchase price, surveys, appraisals, environmental audit, permitting, legal costs, maps, charts, aerial photography, and other associated costs.

Construction: This includes costs incurred by the County for all construction related tasks required to place a project in service. This includes project construction contracts, professional and technical assistance, county engineering costs, legal and technical documentation costs, inspection, testing and permitting.

Professional Services: Non-recurring, non-capitalizable costs incurred by the County for services related to a capital project, such as required environmental monitoring costs and other such costs. These costs are generally incurred after the constructed asset is capitalized.

CAPITAL IMPROVEMENT IMPACTS

The capital improvements program includes expenditures for projects that add to the capital assets or infrastructure of Seminole County. The planning, permitting, design and construction of these projects often carry over from one fiscal year to the next. The capital improvements budget usually shows large fluctuations from year to year due to the timing of the completion of numerous individual projects. Revenues for capital projects come from diverse sources, including long-term bonds, impact fees, taxes and grants.

Operating and Capital Budgets How Are They Related?

The operating and capital budgets of Seminole County are intimately related to each other. Many capital projects, especially those involving new infrastructure, result in increased operating costs. The costs of operating and maintaining new infrastructure are always considered in the operating budget. It is Seminole County's philosophy that new projects are only undertaken if current and future operating revenues are sufficient to fund the operating costs associated with new capital projects.

As a general rule, capital projects are budgeted separately from the operating budgets in various projects or funds. Exceptions to this are enterprise funds, such as those that fund the Environmental Services Department. These departments budget capital projects within their funds in accordance with generally accepted accounting principles for enterprise funds. Other capital projects are funded through the sales tax referendum, long-term debt, specially designated ad-valorem taxes, and interfund transfers to capital projects funds.

NON-BASE PROJECT TYPES

Non-base budgets are non-recurring, one-time funding allocations (often called Projects) that are established in order to complete a specific scope of work or procurement. These can be Capital Improvement Projects, Fleet, Facilities, Technology, and Other One-Time equipment, studies, or operating projects. While these budgets are adopted on an annual basis, the expectation is that they will not expire until the scope is completed. Non-base “projects” are generally fully funded up front and available balances are eligible for “Carryforward” to be budgeted in the new fiscal year. Non-Base Budgets are segregated in individual Business Units, which are organized into the following types:

CAPITAL IMPROVEMENT PROGRAM PROJECTS – These are one-time budgets, typically greater than \$100K that result in new infrastructure or significant improvements. Includes all land, design, construction, and operating costs required to complete the project. They are 8 digits in length. EX: 00015002 NEW OXFORD RD WIDENING. CIP projects are eligible for carryforward and are managed by the user departments.

FLEET – These are one-time budgets allocated for rolling stock and generators. Includes all costs associated with putting a vehicle into service. BU Name identifies asset number of the vehicle being replaced. They are 8 digits in length. EX: 01905008 FORD F550 WOODS TRUCK-01374. Fleet projects are eligible for carryforward and are managed by the Fleet Program.

TECHNOLOGY – These are one-time budgets allocated for new software or hardware that will be plugged into the County Network, typically, over \$5K. They are 8 digits in length. EX: 02005023 JDE TELESTAFF INTERFACE. Technology projects are eligible for carryforward and are managed by the Information Services Department.

FACILITIES PROJECTS – These are one-time budgets allocated for improvements to County owned facilities, typically, over \$5K. They are 8 digits in length. EX: 00234820 LAKE MARY LIBRARY PARKING LOT. Facilities projects are eligible for carryforward and are managed by the Facilities Program.

EQUIPMENT, STUDIES, OTHER – These budgets are allocated for all other one-time needs. They primarily include equipment, studies, and other one-time operating projects. Typically, over \$5K. They are 8 digits in length. EX: 00008094 FITNESS EQUIPMENT REPLACEMENT. Equipment, Studies, Other projects are eligible for carryforward and are managed by the departments.

GRANTS – These are one-time budgets associated with Federal, State, and Local Grant agreements. Must include revenues and expenditures. Also includes grants associated with Capital Projects. They are 8 digits in length. EX: 00276945 DCF REINVESTMENT GRANT 2017-20. Grant projects are eligible for carryforward and are managed by the departments.

PURPOSE OF THE CAPITAL IMPROVEMENT ELEMENT

The purpose of the annual update to the Capital Improvements Elements (CIE) Plan is to adopt a five year, financially feasible schedule of capital improvements for each facility element. These improvements address the maintenance of adopted level of Service Standards and the achievement of adopted element policies and program goals. The CIE is updated annually as required by state law and included as part of the annual Text Amendments to the Seminole County Comprehensive Plan which are adopted separately by the Board of County Commissioners. In preparing the document, staff evaluates program and project costs, reviews revenue sources and projections to ensure adequacy to cover the five-year period and reviews facility services to ensure maintenance of the adopted Level of Service standards.

Seminole County’s Comprehensive Plan is comprised of the facility elements specified in Rule 9J-5, Florida Administrative Code. The elements are designed to ensure that the County’s growth management plan is supported by adequate services and infrastructure in a timely fashion. The CIE provides an assurance of effective facility elements implementation by adopting a financially feasible five-year schedule of improvements for each type of facility, and by measuring whether those improvements are adequate to meet current and projected demands covering the 5-year period.

The Capital Improvement Program is organized by CIE Facility Element. However, not all projects included in the Capital Improvement Program are CIE projects. Non-CIE projects are generally included in the Capital Improvement Program in the related CIE Facility Element.

PURPOSE OF THE CAPITAL IMPROVEMENT ELEMENT

Definitions of CIE Facility Elements

TRANSPORTATION – Provides goal, objectives and policies within the County’s Comprehensive Plan to address the County’s transportation needs in terms of safety, capacity, and variety – car, bus, rail, bike and pedestrian. The adopted levels of service vary by the type of road and can be found in the Transportation Element of the Comprehensive Plan.

DRAINAGE – Provides goal, objectives and policies within the County’s Comprehensive Plan to address adequate drainage, flood control and water quality within the County.

POTABLE WATER – Provides goal, objectives and policies within the County’s Comprehensive Plan to address the provision of clean water to County customers and the protection of water sources from contamination. The adopted level of service is 350 gallons per day per residential unit.

SANITARY SEWER – Provides goal, objectives and policies within the County’s Comprehensive Plan to insure proper treatment and disposal of wastewater. The adopted level of service is 300 gallons per day per residential unit.

SOLID WASTE – Provides goal, objectives and policies within the County’s Comprehensive Plan to address the proper pickup and disposal of solid waste products in the County. The adopted level of landfill disposal is 4.2 lbs. per day per dwelling unit and 4.7 lbs. per employee.

RECREATION & OPEN SPACE – Provides goals, objectives and policies within the County’s Comprehensive Plan to insure a variety of adequate recreational facilities within the County. The adopted level of service is 3.6 acres of recreational land per 1,000 population of which 1.8 acres is to be developed (such as a ball field), the remainder being left in a more natural state (such as trails).

PUBLIC SAFETY – Projects that provide for public safety and do not naturally fall into one of the CIE Facility Elements are included in the Capital Improvement Program as a Public Safety project.

MASS TRANSIT – Provides goal, objectives and policies within the County’s Comprehensive Plan to address mass transportation. Currently the County is committed to supporting the State in funding mass transit.

GENERAL GOVERNMENT – Projects which do not naturally fall into one of the CIE Facility Elements are included in the Capital Improvement Program as a General Government project.

Project Description:

REPLACE ALL SYNTHETIC FIELDS. REPLACE HUB A AND HUB B. NOTE: FY 24/25 HUB A WILL BE 9 YEARS LIFE. WARRANTY ON THESE FIELDS ARE 8 YEARS. AS OF FY 23, HOME PLATE AND BATTERS BOXES HAVE ALREADY HAS BEEN REPLACED TWICE AND AROUND EACH SECOND BASE ONCE. REPLACE NATURAL GRASS FIELDS IN HUBS C/D WITH SYNTHETIC FIELDS THAT TOURNAMENT ORGANIZATIONS CAN PLAY ON MUCH SOONER AFTER HEAVY RAINS. THE CHANGE WOULD SIGNIFICANTLY REDUCE CANCELLATIONS AND POSTPONEMENT OF TOURNAMENTS. THIS WOULD DRASTICALLY REDUCE MAINTENANCE DOWNTIMES FOR FIELD RESTING AND STAFFING COSTS ASSOCIATED WITH PREPPING FIELDS. SOME TOURNAMENT ORGANIZERS (PG MAINLY) SHY AWAY FROM USING THESE FIELDS DURING THE RAINY SEASON DUE TO FEAR OF CANCELLATION AND DELAYS. CHANGING TO SYNTHETIC FIELDS WOULD ALLOW FOR THE PARK TO ACCOMMODATE OTHER SPORTS AS WELL INCLUDING FAST PITCH SOFTBALL, 7X7 SOCCER AND FLAG FOOTBALL. THIS CHANGE WOULD ALSO INCREASE REVENUE FOR THE FACILITY SIMILAR TO THE OTHER TWO HUBS.
